

TREX FENCING

Bracing Back Rail For Horizons and Seclusions Horizontal Fence Systems

Properly installed, the composite pickets in Trex Horizons and Seclusions Horizontal will keep their clean horizontal lines. However, if the fence boards experience bowing due to improper installation or environmental conditions, a vertical rail can be added to the back of the fence to help bring the pickets into alignment. The bracing rails with nylon plugs can be purchased from Trex Fencing to attach after the fence is installed.

1" color-matching self-tapping trim head screws attach pickets through interlocking "knuckles" to bracing back rail

Bracing rail attaches on back side of fence
